

## BRÜCKENGESCHICHTEN CALL

We all come from somewhere. We all live somewhere, too.

But what is special about the place in which you move about every day?

Why is it precisely here that you feel at ease and have a sense of belonging? Or do you feel excluded and eternally foreign?

What has remained the same for years, and what changes on a daily basis?

The project "Brückengeschichten" wants to know from you:

What is it that makes up Hörde's identity? There are still traces of the steel industry here, but a lot has also changed and is still in flux.

It is this change that turns the past into something new and builds bridges between the past, the present and the future.

Join in and tell us about your experiences and memories.

Together with other people, you can give your district Hörde a voice.

All sound recordings will be collected and edited by us. After that, you can listen to them at different places in Hörde as well as on the internet.

We all come from somewhere and we all live somewhere.

And you live in Hörde. Become part of "Brückengeschichten".
